

River Pool at Beacon Inc.

Today, due to considerable water quality improvements in the Hudson River and growing community interest in recreational river swimming, the construction of a river pool is a timely endeavor.

Pete Seeger says, “There is a generation that grew up hearing about the pollution of our waterways. Now it’s a time to spread the word about the rejuvenated river, the cleaner river, our precious Hudson River. What better way than to invite families with youngsters to bring the children down to the riverside for a cooling dip in a small pool on a warm summer day?”

River Pool is a non-profit volunteer organization with several active committees. To help with this project please join us!
